

CustomCapabilities

CONCEPT TO REALITY

CONCEPT TO REALITY

Jofco's capabilities extend far beyond the standard product offering. From minor dimension adjustments to a complete custom office layout, Jofco can turn concepts into reality.

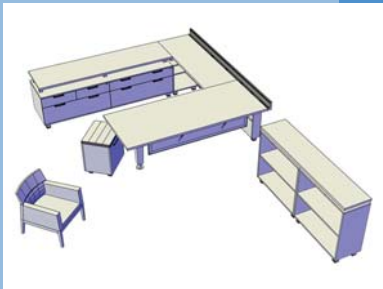

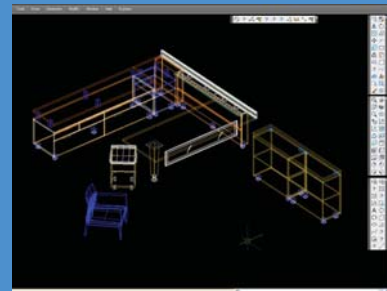

IT STARTS WITH AN IDEA

The customization process begins with a simple sketch or list of ideas. Products are molded to fit the client's original vision.

CONSTRUCTION + ENGINEERING SUPPORT

Using the most advanced 3D visualization software, Jofco's team of skilled engineers and product development managers determine the technical details necessary to construct the product.

A CONTINUOUS EVOLUTION

Ideas are developed as the project evolves. AutoCAD drawings assist in presenting different options in order to facilitate final design decisions. Constant communication between the client and Jofco is essential.

VISUALIZING THE FINAL PRODUCT

Rendering software is used to enhance the final design drawing. Once the final design has been approved, the project moves to manufacturing and construction is underway.

BEYOND MANUFACTURING

Jofco's involvement extends beyond design and manufacturing. Onsite installation assistance is provided whenever necessary, and a thorough follow-up check is completed to assure client satisfaction.
