Relief Upholstery Detail

Cantilevered Arm

Specifications

Mechanism

Synchro-tilt mechanism - provides a synchronized ride that cradles the occupant as they recline, along with the ergonomic benefit of a reduced front edge seat rise.

23 degrees of tilt travel - allows user to achieve a wide variety of positions.

6 position tilt lock - includes an anti-kickback safety feature and is easily accessed from the side.

Tension control - side activated, telescoping handle offers a comfortable way to regulate spring force.

Gas assist lift - easy, side access to seat height adjustment paddle with a 4" range from 17.5"-20.5".

Seat slider - side activated with spring return allows 2-1/2" adjustment of seat depth.

Base

Polished aluminum 5-star base with dual wheel casters.

Arms

Die cast aluminum arm with upholstered arm pad creates a modern aesthetic and provides a comfortable arm rest. As occupant reclines, the cantilevered arm moves with the back and maintains occupant's arm position.

Back Construction

A steel frame encased in suspension material with molded foam conforms to the contours of the occupant's back, providing both support and comfort.

Seat Construction

A molded plywood seat pan with applied molded foam provides long term comfort. The foam will not bottom out on the seat pan and maintains its contours without breaking down.
